Outdoor porcelain pavers have the same benefits as regular interior porcelain—being frost-resistant, skid-resistant, durable and easy to clean—combined with incredibly high breakage loads creates the perfect solution for gardens, terraces and high traffic outdoor areas. Outdoor porcelain pavers can be dry laid onto grass, gravel, dirt and sand—or onto terraces and roofs using raised supports—without grout, adhesives or specialized workers, making installation incredibly easy.

Resistant

TO FREEZE THAW

Because it is 100% frost-free and its properties remain unaltered at temperatures of -60°F to +140°F.

TO BREAKAGE

Because every slab can withstand loads of over 2200 lbs.

TO CHEMICAL AGGRESSION

Because our pavers are unaffected by alkalis, acids, chemical agents, salt and other deicing materials.

TO STAINS

Because a high density and ultra-low absorption rate creates a tight paver surface, it fends off surface mold, moss, dirt and other types of stains.

Easier

TO CLEAN

Because it can be cleaned with normal house hold cleaners and even pressure washed with no concern.

TO LAY

Because of superior accuracy in dimensional sizing and linear sides, the pavers allow for perfectly executed installations with tight and accurate lines.

TO REMOVE

Because a 24" x 24" slab weighs just 37 lbs., its light weight permits easy removal, serviceability and even reusability. (Excluding adhered installations).

FOR YOU

Because the structured top textures formed on the surface of our pavers create non-slip surfaces.
